

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the application:

LISTING OF CLAIMS:

1. (currently amended): A coating material comprising a fractionated yeast cell wall and at least one member selected from the group consisting of viscous polysaccharides, oligosaccharides, ~~hardened fats and oils, waxes,~~ one or more sugar alcohols selected from the group consisting of xylitol, paratinit, maltitol, erythritol and lactitol and starch hydrolyzates, said coating material, when applied to the exterior of a core substance, forming a layer of the coating material which covers the core substance as a discrete layer.

2. (original): The coating material as described in claim 1, wherein the viscous polysaccharide is pullulan.

3. (original): The coating material as described in claim 1, wherein the oligosaccharide is at least one member selected from the group consisting of trehalose, paratinose and raffinose.

4. (currently amended): A coated powder comprising a core substance in a powdery or granular form of 30 to 3000 μm in an average particle size having been coated with 0.05 to 1.5 parts by weight of a coating material comprising a fractionated yeast cell wall and at least one member selected from the group consisting of viscous polysaccharides, oligosaccharides, ~~hardened fats and oils, waxes,~~ one or more sugar alcohols selected from the group consisting of xylitol, paratinit, maltitol, erythritol and lactitol and starch hydrolyzates per 1 part by weight of

AMENDMENT UNDER 37 C.F.R. §1.116
U.S. Appln. No. 09/866,610

said core substance, said coating material being applied to the exterior of the core substance so as to form a layer of the coating material which covers the core substance as a discrete layer.

5. (previously presented): The coated powder as described in claim 4, wherein the viscous polysaccharide is pullulan.

6. (original): The coated powder as described in claim 4, wherein the oligosaccharide is at least one member selected from the group consisting of trehalose, palatinose and raffinose.

7. (previously presented): The coated powder as described in claim 4, wherein the core substance is a flavor composition, a color material, an acidity regulator, a seasoning, a sweetener, a spice, a vitamin, a powdered form of polyphenols of perilla extract or buckwheat, propolis, royal jelly, or a mixture of two or more of them.

8. (original): The coated powder as described in claim 7, wherein the core substance is a flavor composition.

9. (previously presented): A food or beverage composition which comprises the coated powder described in any one of claims 4, 5, 6, 7 or 8.

10. (previously presented): A perfumy cosmetic composition which comprises the coated powder described in any one of claims 4, 5, 6, 7 or 8.

11. (currently amended): A process for producing a coated powder, which comprises spraying a solution of a coating material comprising a fractionated yeast cell wall and at least one member selected from the group consisting of viscous polysaccharides, oligosaccharides,

~~hardened fats and oils, waxes, one or more~~ sugar alcohols selected from the group consisting of xylitol, paratinit, maltitol, erythritol and lactitol and starch hydrolyzates against a core substance in a powdery or granular form of 30 to 3000 μm in an average particle size under stirring or in a fluidized state to thereby coat the core substance with 0.05 to 1.5 parts by weight of the coating material per 1 part by weight of said core substance, said coating material being applied to the exterior of the core substance so as to form a layer of the coating material which covers the core substance as a discrete layer.

12. (previously presented): The coated powder as described in claim 5, wherein the core substance is a flavor composition, a color material, an acidity regulator, a seasoning, a sweetener, a spice, a vitamin, a powdered form of polyphenols of perilla extract or buckwheat, propolis, royal jelly, or a mixture of two or more of them.

13. (previously presented): The coated powder as described in claim 6, wherein the core substance is a flavor composition, a color material, an acidity regulator, a seasoning, a sweetener, a spice, a vitamin, a powdered form of polyphenols of perilla extract or buckwheat, propolis, royal jelly, or a mixture of two or more of them.

14. (previously presented): The coated powder as described in claim 12, wherein the core substance is a flavor composition.

15. (previously presented): The coated powder as described in claim 13, wherein the core substance is a flavor composition.

Claims 16-18 (canceled).

AMENDMENT UNDER 37 C.F.R. §1.116
U.S. Appln. No. 09/866,610

19. (previously presented): The coating material as described in claim 1 wherein said at least one member is the viscous polysaccharides.

20. (previously presented): The coating material as described in claim 1 wherein said at least one member is the oligosaccharides.

Claims 21 and 22. (canceled)

23. (currently amended): The coating material as described in claim 1 wherein said at least one member is the ~~sugar alcohols~~ one or more sugar alcohols selected from the group consisting of xylitol, paratinit, maltitol, erythritol, and lactitol.

24. (previously presented): The coated powder as described in claim 4, wherein said at least one member is the viscous polysaccharides.

25. (previously presented): The coated powder as described in claim 4, wherein said at least one member is the oligosaccharides.

Claims 26 and 27 (canceled).

28. (currently amended): The coated powder as described in claim 4, wherein said at least one member is the ~~sugar alcohols~~ one or more sugar alcohols selected from the group consisting of xylitol, paratinit, maltitol, erythritol, and lactitol.

29. (previously presented): The process as described in claim 11, wherein said at least one member is the viscous polysaccharides.

AMENDMENT UNDER 37 C.F.R. §1.116
U.S. Appln. No. 09/866,610

30. (previously presented): The process as described in claim 11, wherein said at least one member is the oligosaccharides.

Claims 31 and 32 (canceled).

33. (previously presented): The process as described in claim 11, wherein said at least one member is ~~sugar alcohols~~ one or more sugar alcohols selected from the group consisting of xylitol, paratinit, maltitol, erythritol, and lactitol.

34. (new): The coating material as described in claim 1, wherein the at least one member is selected from the group consisting of viscous polysaccharides, oligosaccharides and starch hydrolyzates, and wherein said core substance is a flavor composition.

35. (new): The coated powder as described in claim 4, wherein the at least one member is selected from the group consisting of viscous polysaccharides, oligosaccharides and starch hydrolyzates, and wherein said core substance is a flavor composition.

36. (new): The process as described in claim 11, wherein the at least one member is selected from the group consisting of viscous polysaccharides, oligosaccharides and starch hydrolyzates, and wherein said core substance is a flavor composition.

37. (new): A coating material comprising a fractionated yeast cell wall and at least one member selected from the group consisting of viscous polysaccharides, oligosaccharides, and starch hydrolyzates, said coating material, when applied to the exterior of a core substance, forming a layer of the coating material which covers the core substance as a discrete layer.

AMENDMENT UNDER 37 C.F.R. §1.116
U.S. Appln. No. 09/866,610

38. (new): A coated powder comprising a core substance in a powdery or granular form of 30 to 3000 μm in an average particle size having been coated with 0.05 to 1.5 parts by weight of a coating material comprising a fractionated yeast cell wall and at least one member selected from the group consisting of viscous polysaccharides, oligosaccharides, and starch hydrolyzates per 1 part by weight of said core substance, said coating material being applied to the exterior of the core substance so as to form a layer of the coating material which covers the core substance as a discrete layer.

39. (new): A process for producing a coated powder, which comprises spraying a solution of a coating material comprising a fractionated yeast cell wall and at least one member selected from the group consisting of viscous polysaccharides, oligosaccharides, and starch hydrolyzates against a core substance in a powdery or granular form of 30 to 3000 μm in an average particle size under stirring or in a fluidized state to thereby coat the core substance with 0.05 to 1.5 parts by weight of the coating material per 1 part by weight of said core substance, said coating material being applied to the exterior of the core substance so as to form a layer of the coating material which covers the core substance as a discrete layer.
